

**3rd UAE Clinical Simulation Conference, Dubai
23-25 February, 2016**

**Workshop: Designing effective simulation based educational interventions for
individual practitioners, clinical teams and healthcare systems**

Professor Bryn Baxendale
Nottingham University Hospitals NHS Trust, UK

Short Description of the workshop:

Workshop delegates will work through a seven step model that has been developed to promote effective design and integration of simulation based education and training within curricula or as part of a workforce development programme. Delegates are encouraged to bring their own examples and experiences for discussion.

Objectives:

- To introduce delegates to a model that combines principles of curriculum development with best evidence for simulation-base learning
- To provide delegates with the opportunity to apply this model to their area of educational interest or organisational / clinical service development

Target Audience:

Novice and intermediate educators, clinical practitioners, and managers / administrators with an interest in designing educational programmes or courses for specific learner groups or areas of clinical practice
